PROFILE

Product designer with 6+ years in fintech and crypto, specialising in **data-heavy dashboards, multi-state workflows and AI-assisted design tooling**. I own end-to-end design delivery for complex financial products and partner platforms, **improving conversion by 45% and driving ~40% user growth**. I excel at translating ambiguous, logic-heavy problems into scalable end-to-end journeys and aligning cross-functional teams to ship features with speed and quality.

SKILLS

Platform & systems design

AI-assisted design-to-code

End-to-end journey & workflow mapping

UX research & competitive analysis

Wireframes & prototypes

EMPLOYMENT HISTORY

Senior Product Designer, Partner Platforms, Pepperstone

Mar 2025 — Present, Singapore

- Designed and shipped **complex partner-facing dashboards** for relationship management and performance monitoring
- Owned the end-to-end Partner Portal journey, mapping **multi-state system behaviour** across affiliate management, reward tier and marketing tool management suite.
- Led an **AI-native design-to-delivery initiative**, defining new Ways of Working across design, product, and engineering to standardise AI-assisted prototyping and accelerate hand off.

LANGUAGES

English

Mandarin

Cantonese

Product Designer II, Financial Products, OKX

Nov 2023 — Mar 2025, Hong Kong

- Enhanced end-to-end user journeys for **40+ data-intensive financial products**, from exploration to subscription, **increasing conversion by 45%**.
- Designed a centralised campaign platform unifying 10+ promotions into a single scalable system, **driving 39.56% user growth and 48.78% TVL growth**.
- **Routinely analysed customer support inquiries and user behaviour data** to identify pain points and inform product and information-architecture decisions.
- Partnered with engineers, product owners, and stakeholders through **alignment workshops, improving communication efficiency by 40%**.

Experience Consultant, IBM

Aug 2020 — Jul 2022, Hong Kong

- Led the design of **500+ responsive sub-pages across three languages and mobile/desktop** for a global insurance brand, **directing a team of 3** and working with developers and 50+ product and content owners across 5 agile sprints.
- This project is recognised with the **Digital–Insurance Award at the HKB Technology Excellence Awards 2023**.

EDUCATION

University College London (UCL), MSc in Human-Computer Interaction

Sept 2022 — Sept 2023, London

- MSc dissertation project **in collaboration with Google**
- UX design project **published at CHI23 Student Design Competition** with 30% acceptance rate globally

Chinese University of Hong Kong, Bachelor of Electronic Engineering

Sept 2015 — Jul 2019, Hong Kong

- Major GPA: 3.92/4.00 (cGPA: 3.69/4.00); Graduated with **First Class Honor**

VOLUNTEERING

UX Designer, Reach Volunteering

Apr 2023 — Oct 2025, London

- **Full-system revamp of critical user flows**, including onboarding processes, dashboards, account management, search functionalities, and messaging systems.
- Executed **responsive web design** practices to ensure optimal user experience across devices.
- Conducted thorough analysis of user journeys across multiple platforms, **identifying key pain points** through user interviews and behavioral data.
- Defined and implemented a modern visual style, **designing cohesive design system components** to ensure consistency.
